

PROADJUSTER™

Endicott, NY– Imagine

forty years ago if you were told that lasers would replace scalpels in surgery or that robotic instruments would build cars; you may not have believed it. By the same token, would you believe that chiropractic treatment could be performed using a special hand-held instrument developed by NASA scientists; all while you were sitting comfortably in an upright position without any turning or twisting movements?

According to Dr. Baldia, “This new form of computerized treatment is so gentle and effective, that it amazes even the most skeptical patients. It’s call the ProAdjuster and is the latest state-of-the-art technology in existence today, and is the only one in Broome County area”

The ProAdjuster can safely and gently analyze and treat the spine and other joints to remove the nerve impingement that is often the cause of pains in the low back, neck, shoulder and elsewhere in the body. It also works on variety of muscular conditions to loosen tight muscles with ease and comfort. Many patients say that it’s like getting a mini-massage. Even patients with knee, hip and foot problems such as plantar fasciitis are being helped. It is also covered by most health insurance companies including Medicare.

Dr. Baldia says that “The secret to the ProAdjuster lies in its ability to deliver an extremely precise adjustment”. He says that “even through traditional forms of adjusting also work, people are drawn to this new technique because of how gentle it is and that it does not involve any twisting or cracking, especially in the neck. Many people love getting adjusted with traditional manual techniques, all of which are safe and effective. But there are a large number of people who never get to experience the amazing benefits of chiropractic because they are scared to have their spines adjusted in that way”. Now, there is no longer a reason to be wary.

Pain Relief via Chiropractic, with no “Twisting and Cracking”
