

K-LASER™

What is Laser Therapy?

Class IV K-Laser deliver specific red and near-infrared wavelengths of laser light to induce a therapeutic effect within the body. These include increase circulation, decreased swelling, reduction of pain and enhanced tissue repair. Laser therapy has been used in Europe since the 1970's and was cleared by the United States Food and Drug Administration in 2002. K-Laser has become the preferred choice for thousands of practitioners worldwide.

Benefits of Laser Therapy:

Class IV K-Laser Therapy is proven to bio-stimulate tissue repair and growth. The K-Laser accelerates the healing process by decreasing inflammation, pain and scar tissue formation. In the management of chronic and acute pain, Class IV K-Laser Therapy can provide dramatic results.

Numerous Studies show that Laser Therapy can reduce pain associated with:

Carpal Tunnel Syndrome
Myofascial Trigger Point
Neck Pain
Lower Back Pain
Rib Pain
Ligament Sprains

Plantar Fasciitis
Rheumatoid Arthritis
Should, Back & Knee Pain
Shingles
Fibromyalgia
